

Justice Brutus

Product-focused Front-End Engineer

justicebrutus4@gmail.com · Ontario, Canada · justice-portfolio-nine.vercel.app · github.com/justicebrutus

PROFILE

I build interfaces that make complex products clear, credible, and usable. React and TypeScript engineer focused on data-rich interfaces, accessible interaction, responsive systems, and verified releases. I take work from product framing through frontend implementation, responsive QA, and release verification.

SELECTED ENGINEERING WORK

Meridian Capital — Independent product case study

2026

React · TypeScript · React Router · Vitest

- Architected and implemented a 27-route interface spanning an editorial investment-firm website and five connected portfolio-management workspaces.
- Created a shared typed data model powering 24 company records, capital tracking, review decisions, search and filtering, CSV exports, and print-ready reports.
- Built versioned local persistence with corruption recovery, keyboard-accessible workflows, reduced-motion support, and task-specific desktop, tablet, and mobile layouts.
- Verified core data and decision workflows with 46 automated tests, production builds, and browser QA across five target viewport sizes.

Luxen Mix Analyzer — Browser audio workbench

JavaScript · Web Audio API · Canvas · DSP

- Implemented a zero-dependency radix-2 FFT, loudness metering, phase-vocoder retuning, and spectral separation in a keyboard-operable browser instrument.

HALO — Interactive canvas system

React · Canvas · Performance

- Built a responsive particle system with cursor physics, cached glow sprites, performance controls, and reduced-motion behavior.

TECHNICAL CAPABILITIES

Frontend	React, TypeScript, JavaScript, React Router, semantic HTML, modern CSS, responsive interface systems
Product UI	Data-rich workflows, forms and validation, keyboard interaction, focus management, accessibility, reduced motion
Quality	Vitest, Testing Library, browser QA, responsive testing, performance review, Vite, Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

Filament Winding Operator · RS Poles

June 2025–Present

Tilbury, Ontario

- Execute production work where process discipline, equipment condition, accurate handoffs, and traceable records directly affect output quality.
- Earned independent equipment-troubleshooting responsibility within 2.5 months through reliable execution and self-directed technical learning.

EDUCATION

High School Diploma · Chatham-Kent Secondary School · 2019
