

JUSTICE BRUTUS

Front-End & Creative Developer

justicebrutus4@gmail.com · 437-980-5878 · Windsor / Chatham-Kent, ON · github.com/justicebrutus

PROFILE

Self-taught front-end developer with a background in audio production. I ship complete, deployed products across very different domains — real-time DSP, AI-driven tooling, and cinematic motion — writing the hard parts by hand and holding an accessibility bar. Three live apps below, each built, verified, and deployed end to end.

SELECTED PROJECTS

Luxen Mix Analyzer — Browser Audio Workbench

Vanilla JS · Web Audio · luxen-mix-analyzer.vercel.app

- Built a full client-side audio tool with **zero dependencies** — hand-wrote the DSP: a radix-2 **FFT**, ITU-R BS.1770-4 gated **LUFS** metering, a **phase-vocoder** retune, and spectral vocal/instrumental separation.
- Cohesive UI with restyled native controls, keyboard operability, and **WCAG AA** contrast verified across states.

Brand Kit Generator — AI Brand-System Tool

React · Vite · Tailwind · brand-kit-generator-five.vercel.app

- A sentence becomes a full brand kit: a colour engine with computed WCAG contrast, a font-pairing system, a wordmark, and a live website mockup — plus a tailored **PDF** export.
- **AI orchestration** — a two-step Anthropic chain (strategy → copy) via bring-your-own-key, with a local fallback so it always works.

HALO — Creative-Technology Studio Site

React · Framer Motion · Canvas · halo-studio-pied.vercel.app

- A dark, cinematic studio site built around an **interactive generative halo** — a hand-written canvas particle system (sprite-based glow, cursor physics) that visitors can retune live.
- Scroll choreography with Framer Motion; a starfield, shooting stars, and performance tuning that keeps it smooth.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), HTML5, CSS3
Frameworks	React, Vite, Tailwind CSS, Framer Motion
Web platform	Web Audio API, Canvas 2D, OfflineAudioContext, responsive layout
Engineering	DSP & algorithms (FFT, LUFS, phase vocoder), AI orchestration (Anthropic API), performance optimization
Craft & tooling	Accessibility (WCAG AA, ARIA, reduced-motion), design systems; Git & GitHub, Vercel, VS Code

ADDITIONAL EXPERIENCE

Filament Winding Operator — RS Poles, Tilbury, ON · Jun 2025–Present

- Trusted with independent equipment troubleshooting within 2.5 months — evidence of fast, self-directed technical learning. Earlier: Independent Audio Engineer (Luxen, 2024–present); Set-Up Technician (Nartech Metal Products); Property Maintenance (Epstein Property Care).

EDUCATION

High School Diploma — Chatham-Kent Secondary School, 2019

Self-directed study — front-end development, React, Web Audio, and DSP (ongoing).
