

Justice Brutus

Product-focused Front-End Engineer

justicebrutus4@gmail.com · Ontario, Canada · justice-portfolio-nine.vercel.app · github.com/justicebrutus

SUMMARY	I build interfaces that make complex products clear, credible, and usable. React and TypeScript product engineering with accessible interaction, responsive systems, and end-to-end release ownership. I take work from product framing through implementation, responsive QA, and release verification.	
SELECTED ENGINEERING WORK	Meridian Capital — Product case study	2026
	React · TypeScript · React Router · Vitest - Built a 27-route product experience spanning an editorial institutional website and a five-workspace portfolio console. - Designed one typed 24-company record to drive portfolio claims, responsibility mapping, capital exceptions, reviews, filters, CSV reporting, and responsive company records. - Implemented accessible interaction, reduced-motion behavior, versioned local persistence and recovery, and an automated suite covering core data and decision workflows.	
	Luxen Mix Analyzer — Technical lab	
JavaScript · Web Audio API · Canvas Implemented a zero-dependency radix-2 FFT, loudness metering, phase-vocoder retuning, and spectral separation in a keyboard-operable browser interface.		
TECHNICAL CAPABILITIES	HALO — Interactive creative technology	
	React · Canvas · Performance Built a responsive particle system with cursor physics, cached glow sprites, performance controls, and a reduced-motion mode.	
	Interface engineering	React, TypeScript, JavaScript, React Router, semantic HTML, modern CSS, responsive systems
	Interaction and access	Keyboard workflows, focus management, reduced motion, forms, validation, Canvas, Web Audio
	Quality and delivery	Vitest, Testing Library, browser QA, content integrity, performance review, Vite, Git, Vercel
PROFESSIONAL EXPERIENCE	Filament Winding Operator · RS Poles	June 2025–Present
	Tilbury, Ontario - Operate within a production environment where process discipline, equipment condition, handoffs, and traceable work directly affect output. - Earned independent equipment-troubleshooting responsibility within 2.5 months through reliable execution and self-directed technical learning.	
EDUCATION	High School Diploma · Chatham-Kent Secondary School · 2019
